ZENLITE® ARC2 Pendant Mount

Instruction Sheet

preciseLED
Precision Through Innovation

!CAUTION! To be used with Class 2 Power Units only.

- For your safety, read and understand instructions completely before starting installation

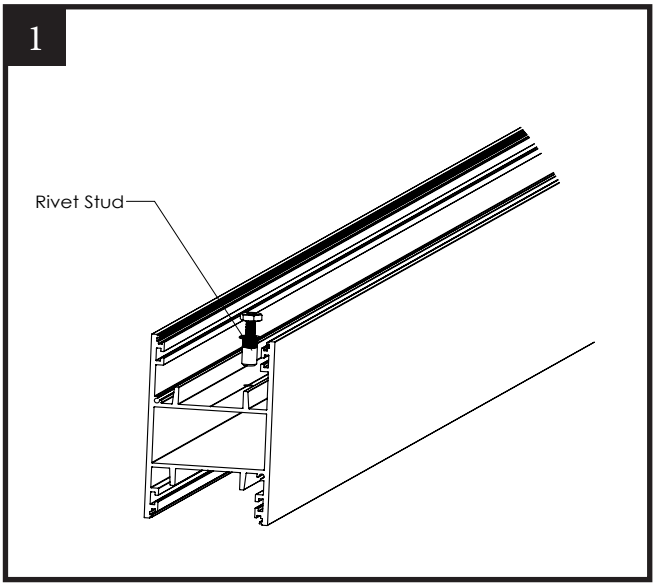
Note: PreciseLED fixtures are designed to meet the latest NEC requirements and are listed in full compliance with UL 1598. Before attempting installation of any lighting fixture, check your local electrical building code. This code sets the wiring standards and installation requirements for your locality and should be understood before starting work. If fixture is to be switch from wall switch or dimmer, make sure black supply wire properly connected to switch or dimmer (follow switch/dimmer instructions).

- **WARNING:**

1. Before wiring to power supply, turn off electricity at the fuse or circuit break box.
2. Insulation may be placed in direct contact with ANY part of the fixture.
3. Always have installation performed by a licensed electrician.

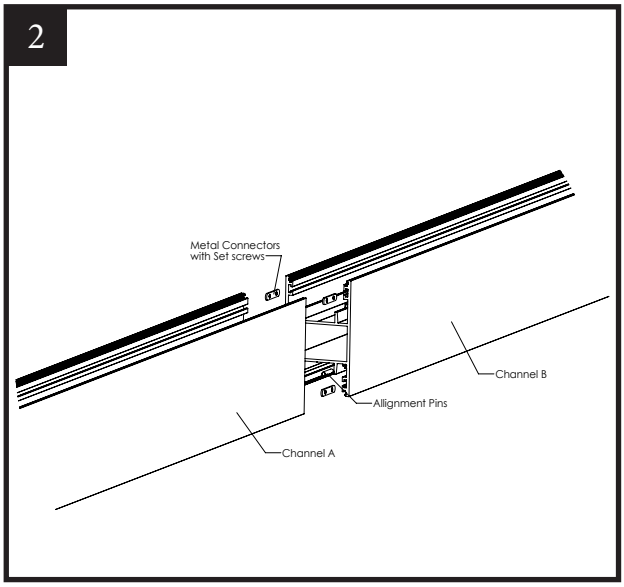
FIXTURE INSTALLATION

1



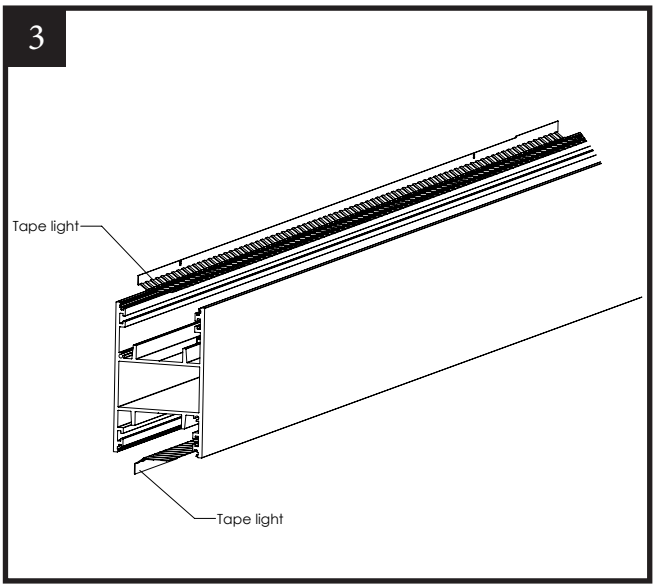
1. Drill a hole at the desired location using a 17/64” drill bit. Install the rivet stud using the nut and an impact drill. This will be used for the pendant kit installation later.

2



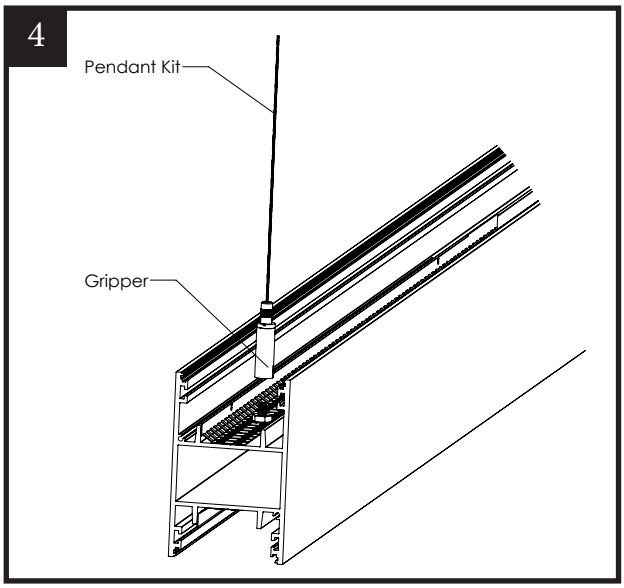
2. To connect the two channels together, insert the metal connectors and the alignment pins into the slots along the sides of the channels. Secure them by using the set screws.

3



3. Remove the adhesive backing from the tape light and attach the tape light to the channel.

4



4. Screw the gripper onto the rivet stud and install the pendant kits.
